EFFECTIVENESS OF COVID COUNTERMEASURES: MANDATES, RESTRICTIONS AND LOCKDOWNS

“Instead of understanding the pandemic, we were encouraged to fear it. Instead of life, we got lockdowns and death. We got delayed cancer diagnoses, worse cardiovascular-disease outcomes, deteriorating mental health, and a lot more collateral public-health damage from lockdown. Children, the elderly and the working class were the hardest hit by what can only be described as the biggest public-health fiasco in history.”

“Lockdowns and school closures denied children exposure to environmental pathogen, and as such limited optimal training of their innate immune system antibodies & natural killer cells (NK); risk to RSV etc. By locking down and closing schools and the ridiculous specious non-scientific masking, we have damaged the immune system of children and now they are at risk of RSV and a host of other pathogen.”

- Dr. Paul Alexander

“Lockdowns managed to destroy countless businesses, upend human rights, kill millions, cast hundreds of millions deeper into poverty, strain the mental health of billions, and transfer trillions of dollars in wealth from the world’s poorest to the very richest - all while failing to slow the spread of a virus that was subsequently confirmed to have an infection fatality rate under 0.2%.”

- Jeffrey A. Tucker, President of the Brownstone Institute

<https://brownstone.org/articles/why-the-silence-on-lockdowns/>

“Lockdown was a panic measure and a monumental mistake on a global scale, the cure was worse than the disease. I never want to see national lockdown again. We absolutely should never return to a position where children cannot play or go to school. I believe the harm lockdown is doing to our education, health care access, and broader aspects of our economy and society will turn out to be at least as great as the harm done by Covid-19.”

- Prof. Mark Woolhouse

“I think lockdowns saved no lives. There is no doubt in my mind that when we come to look back on this, the damage done by lockdowns will exceed any saving of lives by a huge factor. I think it may have cost lives. Social damage – domestic abuse, divorces, alcoholism – has been extreme. And then you have those who were not treated for other conditions.”

- Prof Michael Levitt, Stanford University
and Nobel Prize winner in Chemistry

“Coronavirus shutdowns are a mass casualty incident with exponentially growing negative health consequences to millions of non-COVID patients... Keeping schools and universities closed is incalculably detrimental for children, teenagers, and young adults for decades to come. It is impossible to overstate the short, medium, and long-term harm to people’s health with a continued shutdown. The millions of casualties of a continued shutdown will be hiding in plain sight.”

“160+ Research Studies Affirm Naturally Acquired Immunity to Covid-19: Documented, Linked, and Quoted.”

<https://brownstone.org/articles/research-studies-affirm-naturally-acquired-immunity/>

Over 100,000 of the world’s leading infectious disease doctors, medical scientists and covid-treating physicians agree that lockdowns were a mistake and caused more harm than good. Yet the vast majority of governments all over the world took the exact opposite actions - they mandated restrictions and draconian measures for EVERYONE, without knowing or following the true science of covid.

As a result, there have been MORE illnesses and deaths from government lockdowns, restrictions and mandates than from this virus.

- ▶ There have been more illnesses and deaths from undiagnosed and untreated worse diseases such as cancers, heart disease, lung disease, tuberculosis and others, than from covid. These undiagnosed and untreated diseases were a direct result of the fear and lockdowns surrounding covid. Tens of millions of people all over the world weren't treated for these deadly diseases because of all the attention on covid.
- ▶ Every year, 3 Million children starve to death. Because of lockdowns, many millions MORE children have died of starvation, according to the UN, UNICEF and WHO. More children have starved to death than have died from covid - yet very little attention or government "mandates" are brought to bear on this issue.
- ▶ Suicides have skyrocketed as a result of lockdowns and isolation, to include teens. **"But there has been another cost that we've seen, particularly in high schools. We're seeing, sadly, far greater suicides now than we are deaths from COVID. We're seeing far greater deaths from drug overdose that are above excess than we are seeing deaths from COVID."** - Former CDC Director Dr. Robert Redfield
- ▶ Drug and alcohol abuse have also increased greatly, as have domestic abuse and violence.
- ▶ Tens of thousands of elderly people in nursing homes have died prematurely from loneliness, because they haven't been able to see their families.

Were government lockdowns, school closures, mask mandates and other restrictions effective against covid? The answer is a conclusive NO.

"Covid Policy Killed More Than Virus, Justice Needed. We killed most of the people with the deadly COVID policy and had we done NOTHING, nothing, save strongly protecting the vulnerable and isolating only sick unwell, symptomatic persons, then we would have lost far fewer persons. Most of the Americans and Canadians who died during the Covid emergency were actually not killed by the virus, but through fraudulent "treatments" promoted by government and the lack of effective treatments that were suppressed by policymakers."

- HHS Advisor Dr. Paul Alexander

"Among COVID-19 exposed individuals, people in their 70s have roughly twice the mortality of those in their 60s, 10 times the mortality of those in their 50s, 40 times that of those in their 40s, 100 times that of those in their 30s, 300 times that of those in their 20s, and a mortality that is more than 3000 times higher than for children. Since COVID-19 operates in a highly age specific manner, mandated counter measures must also be age specific. If not, lives will be unnecessarily lost.

“The government’s anti-COVID19 measures] are grotesque, absurd and very dangerous. The life expectancy of millions is being shortened. The horrifying impact on the world economy threatens the existence of countless people. The consequences on medical care are profound. All these measures are leading to self-destruction and collective suicide based on nothing but a spook.”

“We Need to stop following the Pied Piper on COVID. The time has come for homo sapiens to stand up and start becoming humans again. This scare, this global panic has caused man to lose reason, to stop thinking and to follow the Piper’s call, and we are being led to our downfall.”

“We know that 95% of the population has practically minimal risk. It's unlikely that in the current situation we are really saving lives. I think we're killing people by following some of these measures forever. It just wrecks people's lives, it creates unemployment, it leaves people with no hope. I believe that in the current situation, prolonged lockdowns are going to do enormous harm to health and more.”

“The great body of evidence shows that COVID-19 lockdowns, shelter-in-place policies, masks, school closures, and mask mandates have failed in their purpose of curbing transmission or reducing deaths. These restrictive policies were ineffective and devastating failures, causing immense harm especially to the poorer and vulnerable within societies. The benefits of the societal lockdowns and restrictions have been totally exaggerated and the harms to our societies and children have been severe: the harms to children, the undiagnosed illness that will result in excess mortality in years to come, depression, anxiety, suicidal ideation in our young people, drug overdoses and suicides due to the lockdown policies, the crushing isolation due to the lockdowns, psychological harms, domestic and child abuse, sexual abuse of children, loss of jobs and businesses and the devastating impact, and the massive numbers of deaths resulting from the lockdowns that will impact heavily on women and minorities.”

“Grounded in dubious science and cowardly politics, the grievous wounds we have inflicted upon ourselves with the Covid-19 lockdown are becoming more evident every day.

“Tens of thousands more people [in the UK] will die of cancer due to counter-measures for [covid]. [Covid] overall has resulted in a similar number of fatalities to those we'd expect during a bad influenza season. In this crazy world, citizens who thought they lived in a sane, civilised country are treated like imbeciles, unable to make everyday risk assessments for themselves. Meanwhile, no one dares to admit the lockdown itself may be completely misguided, because then everything that has been done in its name will be seen to have been pointless.

“For months it has been clear that our own government and administrations internationally are in a fantasy world. Yet rather than face the uncomfortable truth we may have to learn to live with Covid-19, politicians are intent on pursuing policies which have devastating real-world effects.”

“We know the death rate globally is very low, between 0.1 and 0.5% of those infected. We know that the majority of deaths occurred in people with pre-existing conditions and we also know that in England, the median age of those who died from Covid is above 80. Every death is sad but should the country have been brought to such an abrupt halt - with catastrophic consequences?”

“Initial data falsely suggested that the infection fatality rate was up to 2-3%. But emerging data showed that the median infection fatality rate is 0.23%. Emerging data has shown a staggering amount of so-called ‘collateral damage’ due to the lockdowns. This can be predicted to adversely affect many millions of people globally with food insecurity [82-132 million more people], severe poverty [70 million more people], maternal and under age-5 mortality from interrupted healthcare [1.7 million more people], infectious diseases deaths from interrupted services [millions of people with Tuberculosis, Malaria, and HIV], school closures for children [affecting children’s future earning potential and lifespan], interrupted vaccination campaigns for millions of children, and intimate partner violence for millions of women. In high-income countries, the collateral damage has also been staggering, affecting visits to emergency departments and primary care for acute (e.g., myocardial infarction, stroke) and ‘non-urgent’ (‘elective’ surgery, and cancer diagnosis and treatment) conditions, intimate partner violence, deaths of despair, and mental health. Of excess deaths occurring during the pandemic in high-income countries, 20-50% are not due to COVID-19. There was an unexplained 83% increase of 10,000 excess deaths from dementia in England/Wales in April, attributed to lack of social contact causing a deterioration in health and wellbeing of these patients.”

“The Victorian government’s response to the SARS-CoV-2 virus is now doing more harm than good. These measures will cause more deaths and result in far more negative health effects than the virus itself. Many Australian doctors and other health professionals consider the lockdown

“The question is whether lockdowns worked to control the virus in a way that is scientifically verifiable. Based on the following studies, the answer is no and for a variety of reasons: bad data, no correlations, no causal demonstration, anomalous exceptions, and so on. There is no relationship between lockdowns (or whatever else people want to call them to mask their true nature) and virus control.”

“But there has been another cost that we’ve seen, particularly in high schools. We’re seeing, sadly, far greater suicides now than we are deaths from COVID. We’re seeing far greater deaths from drug overdose that are above excess than we are seeing deaths from COVID.”

- Former CDC Director Dr. Robert Redfield

“It was established in the first few months of the Covid-19 pandemic that the infection mortality risk varied by more than 1,000-fold across the age span, and that people without chronic health conditions such as diabetes, obesity, heart disease, kidney disease, cancer history etc., were at negligible risk of mortality and very low risk of hospitalization. At that point, it was straightforward to define categories of high-risk individuals who on average would benefit from public health interventions, vs low-risk individuals who would successfully weather the infection without appreciable or long-term issues. Thus, an obsessive, one-size-fits-all pandemic management scheme that did not distinguish risk categories was unreasonable and oppressive from the outset. Accordingly, measures promoted by plausibility to reduce infection transmission, even had they been effective for that purpose, have not served good pandemic management. These measures however were never justified by scientific evidence in the first place. ...The negative consequences of large-scale quarantine are so extreme (forced confinement of sick people with the well; complete restriction of movement of large populations; difficulty in getting critical supplies, medicines, and food to people inside the quarantine zone) that this mitigation measure should be eliminated from serious consideration.”

“The narrative that the COVID-19 virus was largely responsible for excess deaths during the pandemic isn’t supported by statistical analyses. The numbers suggest COVID-19 countermeasures - such as lockdowns and social distancing - imposed by governments and public health officials were key contributors to the rise in excess deaths since 2020 when the pandemic began.”

"Lockdowns do not stop the disease. They merely postpone infections until after they are lifted. They can work only if they are kept in place indefinitely. We do not need epidemiologists or mathematical modelers to tell us this. All we need to do is look out of the window and see what is happening in the world. Infections are roaring up in every country where a lockdown has been imposed."

“The sharp worsening in public opinion regarding the affordability of care and medicine is startling, and likely a result of myriad factors related directly and indirectly to the COVID-19 pandemic,” said Dan Witters, a senior researcher for Gallup. “From rapidly rising inflation, to deferred care pushed into 2021, to more people having to pay for COVID-19 care itself, the U.S. healthcare cost crisis is now coming to a head.”

“It has been painfully, depressingly clear since March that the lockdowns, the social distancing, the face masks and all the rest of the nonsense had absolutely nothing to do with the coronavirus. Back in February and March, I called the panic a hoax. This wasn’t because I didn’t believe that the virus existed. “As a group of expert medical generalists, we urgently wish you to consider non-Covid harms and deaths with equal standing as the reported deaths from Covid. We are concerned due to mounting data and real world experience, that a one-track response threatens more lives and livelihood than Covid-lives saved. A total of 30,260 excess deaths have occurred in private homes since March but less than 1 in 10 are due to COVID-19. The pandemic has resulted in an inflation of acute cardiovascular deaths, most of which did not relate to COVID-19. There is a concerning signal that child suicide death rates in the UK increased during lockdown and amongst those reported after lockdown, restrictions to education and other activities, disruption

to care and support services, tensions at home and isolation appeared to be contributing factors.”

“Besides their limited value in containing the virus, lockdown policies have been extraordinarily harmful. The harms to children of suspending in-person schooling are dramatic, including poor learning, school dropouts, social isolation, and suicidal ideation, most of which are far worse for lower income groups. A recent study confirms that up to 78 percent of cancers were never detected due to missed screening over a three-month period. If one extrapolates to the entire country, 750,000 to over a million new cancer cases over a nine-month period will have gone undetected. “The unprecedented global social and economic crisis triggered by the COVID-19 pandemic poses grave risks to the nutritional status and survival of young children in low-income and middle-income countries (LMICs). Of particular concern is an expected increase in child malnutrition, including wasting, due to steep declines in household incomes, changes in the availability and affordability of nutritious foods, and interruptions to health, nutrition, and social protection services. One in ten deaths among children younger than 5 years in LMICs is attributable to severe wasting because wasted children are at increased risk of mortality from infectious diseases.”

“Lockdown harms have affected everyone, with an extra heavy burden on the chronically ill; on children, for whom schools were closed; on the working class, especially those in the densely populated inner cities; and on the global poor, with tens of millions suffering from malnutrition and starvation. For example, Fauci was a major advocate for school closures. These are now widely recognized as an enormous mistake that harmed children without affecting disease spread. In the coming years, we must work hard to reverse the damage caused by our misguided pandemic strategy.”

They have contributed to reducing economic activity, raising unemployment, reducing schooling, causing political unrest, contributing to domestic violence, loss of life quality, and the undermining of liberal democracy. “What killed more than 80% of high-risk vulnerable people in old-aged homes, nursing homes, long-term care homes in Canada in 2020? I argue people did not die due to COVID. No, they may have died ‘with’ COVID but not ‘from’ COVID. The vast majority of deaths happened in 2020 and we must investigate what went wrong and hold people to account. I argue it was the isolation, the misery, dehydration, malnourishment, the devastatingly poor abusive treatment especially as no one was allowed to visit the vulnerable persons. There were no ‘eyes’ and ‘ears’ on them. “It is hard to imagine let alone realize that a syndicate or bio-pharmaceutical complex has formed and has nefarious plans for the world. We believe this syndicate involves the following powerful organizations: World Economic Forum, World Health Organization, Wellcome Trust, Rockefeller Foundation, Gates Foundation, Coalition for Epidemic Preparedness and Innovation, GAVI, Unitaid, and many more with tentacles to and compromised persons in government regulatory agencies such as HHS, CDC, NIH, NHS, MHRA, EMA, and TGA to name a few. When national and global public health emergencies are declared, the syndicate has learned how to use its influence in developed countries to open the doors of the treasury and

through unrestricted emergency counter-measures, fill their coffers to the brim with unprecedented sums of money.

“For COVID-19, the moniker “a needle in every arm” was a central goal of the syndicate. That justified global efforts to promote fear, suffering, hospitalization, and death in order to prepare the world for mass genetic vaccination. Any hope of natural immunity, early therapeutics, or hospital survival had to be crushed so the world could learn to accept a vaccine as the only way out. In the case of COVID-19, it meant a shot every six months without end.”

“It’s well known that employment has impacts on not just an individual’s economic outlook, but their health as well. The idea that we could have somehow suppressed the economy in favor of preventing mortality and impact to health was a false trade-off. The cost of destroying livelihoods has impacts on health and life expectancy. This was well-established in Public Health, yet was constantly ignored by lockdowners. Knowing that the lockdowns completely failed to prevent or even reduce covid spread and mortality, it was clear by mid-2020 that there could only be net harm by adding economic hardship onto the already existing burden of the virus itself. We now have a wealth of research showing the ineffectiveness of lockdowns, yet this reality was abundantly clear even in the midst of the pandemic, as real-time data was able to show its failure in real time.”

EFFECTIVENESS OF MASKS

Surgical masks were designed to keep medical personnel from inadvertently infecting patients’ wounds, NOT to prevent the spread of viruses.

Dr. Vinay Prasad: **“The Cochrane Review on Masks is damning. Masks have no good data to support them | It is a religion, not a science. The science did not change. Public health experts started lying. We never had good data that mask mandates help, or that mask advice**

What they found was alarming to all those recommending we mask our children for several hours every day. The masks were found to be contaminated with 82 bacterial colonies and 4 mold colonies. Where do you think the bacteria, molds, and viruses progressively colonizing and growing on the warm moist mask-mouth interface end up? In more than 50% of cases, a fungal infection will end in death. It’s challenging to diagnose, and fungus infections are often detected either too late, not at all, or treated inappropriately.”

Dr. Jay Bhattacharya: “Children have developmental needs that require them to see other people’s faces. Learning to speak, for instance, requires seeing lips move. For slightly older children, they need to see people, the body, they learn body language, how to interact socially, by watching people. And when you ask them to wear a mask, you sort of cut that out. So you have harms on one side, and very little benefit on the other.”

CDC Website, May 2020 study published in Emerging Infectious Diseases did a systematic review of 10 RCT's on masks from 1946-2018: **"In pooled analysis, we found no significant reduction in influenza transmission with the use of face masks...either when worn by the infected person for source control or when worn by uninfected persons to reduce exposure."**

Canadian review of 11 systematic reviews and 18 RCTs: **Synthesis: "Overall, the use of masks in the community did not reduce the risk of influenza, confirmed viral respiratory infection, influenzalike illness, or any clinical respiratory infection."**

Dr. James Meehan: **"I'm seeing patients that have facial rashes, fungal infections, bacterial infections. Reports coming from my colleagues, all over the world, are suggesting that the bacterial pneumonias are on the rise. New research is showing that cloth masks may be increasing the aerosolization of the SARS-COV-2 virus into the environment causing an increased transmission of the disease. In February and March we were told not to wear masks. What changed? The science didn't change. The politics did. This is about compliance. It's not about science... Our opposition is using low-level retrospective observational studies that should not be the basis for making a medical decision of this nature."**

12 Graphs Show Mask Mandates Do Nothing To Stop COVID:

Dr. Mark McDonald cited an Aug. 11 study by Brown University: **"Children born during the pandemic have significantly reduced verbal, motor, and overall cognitive performance compared to children born pre-pandemic. The masks, "Zoom schools," and lockdown mandates have led to deprivation overall, of social contact, [of] not being able to see faces, being stuck at home all day long, [and this] has actually caused brain damage to the youngsters."**

Professor Carl Heneghan, the director of Oxford University's Centre for Evidence-Based Medicine, cited evidence that pandemic restrictions and the "fear we instill into children" has led to the worsening of psychological problems.

Dr. Mark Sircus: **“We have to stop that deadly virus that is so incredibly virulent that, according to the CDC, 99.8% of those exposed to it survive. Wear your masks is the order of the day, but along the way, many, including the Surgeon General of the United States, have said it is a waste of time.”**

SUMMARY OF KEY COVID FACTS

These summary points have been proven by thousands of studies conducted by tens of thousands of doctors and medical scientists.

- ▶ Medically and scientifically, Covid-19 is a Severe Acute Respiratory Syndrome (SARS) Coronavirus 2, and is named (SARS-CoV-2). There are several SARS viruses, and these have been around for many, many years.
- ▶ The actual overall fatality rate of covid - averaged across all ages - is 0.1 - 0.3%. It is lower for people under 60, and higher for people over 60.

- ▶ *“Among COVID-19 exposed individuals, people in their 70s have roughly twice the mortality of those in their 60s, 10 times the mortality of those in their 50s, 40 times that of those in their 40s, 100 times that of those in their 30s, 300 times that of those in their 20s, and a mortality that is more than 3000 times higher than for children. Since COVID-19 operates in a highly age specific manner, mandated counter measures must also be age specific. If not, lives will be unnecessarily lost.” - Dr. Martin Kulldorff, Harvard Epidemiologist*
- ▶ Children are remarkably immune to covid illness and death. 7X more children die from flus than from covid.
- ▶ Dr. Michael Yeadon points out that the "novel" covid-19 contagion is novel only in the sense that it is a new type of coronavirus: *“There are at least four well characterized family members (229E, NL63, OC43 and HKU1) which are endemic and cause some of the common colds we experience, especially in winter. They all have striking sequence similarity to the new coronavirus.”* So, covid-19 is in the same family of viruses as the common cold and flu, even if it is slightly more lethal.
- ▶ Dr. Michael Yeadon: *“It is now established that at least 30% of our population already had immunological recognition of this new virus, before it even arrived...COVID-19 is new, but coronaviruses are not. A major component our immune systems is the group of white blood cells called T-cells whose job it is to memorise a short piece of whatever virus we were infected with so the right cell types can multiply rapidly and protect us if we get a related infection. Responses to COVID-19 have been shown in dozens of blood samples taken from donors before the new virus arrived.”*
- ▶ PANDA (Pandemic Data & Analytic): *“SARS-CoV-2 presents a negligible risk to the great majority of the world’s population. It primarily poses a risk to elderly, metabolically unhealthy and immunocompromised individuals. Many individuals already had a degree of immunity acquired through previous encounters with similar viruses. Moreover, those infected develop further natural immunity against severe disease, which appears to be more flexible and durable than any protection acquired through the Covid-19 vaccination.”*
- ▶ Covid is easily treatable at the early stages. 80-85% of covid deaths COULD HAVE BEEN PREVENTED. This means millions of covid deaths worldwide were needless.
 - Dr. Peter McCullough: *“COVID-19, no matter what variant, is easily treatable at home. About 85% of hospitalizations and deaths are completely avoidable with early treatment.”*
 - Dr. Theresa Lawrie: *“This medicine prevents deaths by 80%. So 80% of those people who are dying today don’t need to die because there’s ivermectin.”*
 - Dr. Harvey Risch: *“Hydroxychloroquine, ivermectin, and other therapeutics are highly effective in early COVID treatment. These drugs have been suppressed... for reasons that have nothing to do with the science and the medicine.”*
 - Dr. Pierre Kory: *“There is a drug that is proving to be of miraculous impact [against COVID-19]. And when I say ‘miracle,’ I do not use that term lightly. That is a scientific recommendation based on MOUNTAINS of data that has emerged. It basically obliterates transmission of this virus. If you take it, you will not get sick. Early treatment is key.*
 - Dr. Brian C. Joondeph: *“How many COVID deaths could have been prevented if doctors, using their professional and clinical judgement, could have prescribed HCQ without fear of ostracization or loss of their jobs?”*

- ▶ Vaccination cannot prevent infection and transmission. Various severe and fatal vaccine adverse events have been reported, including in young people. A prior infection generally confers superior immunity compared to vaccination.
- ▶ COVID-19 is NOT spread by asymptomatic people. Dr. Anthony Fauci in Oct. 2020: *"In all the history of respiratory borne viruses of any type, asymptomatic transmission has NEVER been the driver of outbreaks. The driver of outbreaks is ALWAYS a symptomatic person. Even if there's a rare asymptomatic person that might transmit [the virus], an epidemic is not driven by an asymptomatic carrier."*
- ▶ Asymptomatic people should not get tested. Natural immunity is robust, complete and durable. *"The virus is not spread asymptotically. Only sick people give it to other people."* - Dr. Peter McCullough
- ▶ Numerous studies have proven that natural immunity is superior to any covid vaccine.
- ▶ Treating covid-19, no matter what variant, is easily treatable at home. For people at high risk or high exposure, early or prophylactic treatment is essential to prevent progression of the disease. According to hundreds of studies, early outpatient treatment of covid significantly reduces hospitalizations and deaths.
- ▶ Age profile: The median age of covid deaths is over 80 years in most Western countries (78 in the US) and about 5% of the deceased had no serious preconditions. The age and risk profile of covid mortality is therefore comparable to normal mortality, but increases it proportionally.
- ▶ Nursing homes: In many Western countries, about 50% of all covid deaths have occurred in nursing homes, which require targeted and humane protection. In some cases, care home residents died not from the coronavirus, but from weeks of stress and isolation.
- ▶ Excess mortality: Overall, the pandemic has increased mortality by 5% to 25% in most Western countries. The majority of additional deaths have NOT been caused by covid, but by government restrictions and lockdowns, as well as an aging population.
- ▶ Symptoms: 85-90% of all infected persons show no symptoms. Overall, about 90% of symptomatic people develop at most mild or moderate symptoms and do not require hospitalization. Early outpatient treatment significantly reduces hospitalizations.
- ▶ Much has been written in the news media and spoken by politicians about the dangers of overcrowded hospitals because of covid-19. There have been many reports of many hospitals swamped with covid patients. Over 90% of these reports are either completely false, or exaggerated. Very few hospitals were overrun with covid at any point over the past 2 years. Those few that were, were overloaded for a short time. The truth is that 98% of all hospitals in the world experienced NO increases over previous years, and NO hospital was ever full or overloaded with only covid patients.
- ▶ Masks: There is still little-to-no scientific evidence for the effectiveness of face masks in the general population, and the introduction of mandatory masks couldn't contain or slow the epidemic in most countries. If used improperly, masks actually increase the risk of infection.
- ▶ Children and schools: In contrast to influenza, the risk of disease and transmission in children is rather low in the case of covid. There was and is therefore no medical reason for the closure of elementary schools or other measures specifically aimed at children.

- ▶ Testing. The PCR test produce 50-95% false positives, depending on how many amplification cycles are run. In this regard, the so-called cycle threshold or ct value is an important parameter.
- ▶ Virus mutations: Similar to influenza viruses, mutations occur frequently in coronaviruses. Most of these mutations are insignificant, but some of them may increase the transmissibility of the virus.
- ▶ Government lockdowns , mandates and restrictions have caused MORE hospitalizations and deaths than covid.
- ▶ According to the UN, lockdowns put the livelihood of 1.6 billion people at acute risk, and push an additional 150 million children into poverty. And additional 3-5 Million children have died from starvation thanks to lockdowns - over and above the usual 3 Million children who starve to death every year.
- ▶ Sweden. In Sweden, covid mortality in 2020, without lockdown, was comparable to a strong influenza season and BELOW the EU average - where the EU used massive lockdowns and mandates. About 50% of Swedish deaths occurred in nursing homes at the beginning of the pandemic. The median age of Swedish covid deaths was around 84 years. (Section 7)
- ▶ Japan. Japan had one of then lowest fatality rates in the world, with NO lockdowns.
- ▶ Taiwan. Taiwan had one of the lowest fatality rates in the world, with NO lockdowns.
- ▶ Africa. African nations have very low fatality and hospitalization rates, with NO lockdowns and very low vaccination rates.
- ▶ India, the second-most populous nation on earth, has very low hospitalization and death rates, thanks to early treatment with inexpensive and successful treatments that have been proven in hundreds of studies.

Dr. Scott Atlas, *Robert Wesson Senior Fellow in health policy at Stanford University's Hoover Institution, Co-Director of the Global Liberty Institute, Founding Fellow of Hillsdale's Academy for Science & Freedom:*

Here are the 10 biggest falsehoods - known for years to be false, not recently learned or proven to be so - promoted by America's public health leaders, elected and unelected officials, and now-discredited academics:

1. SARS-CoV-2 coronavirus has a far higher fatality rate than the flu by several orders of magnitude.
2. Everyone is at significant risk to die from this virus.
3. No one has any immunological protection, because this virus is completely new.
4. Asymptomatic people are major drivers of the spread.
5. Locking down—closing schools and businesses, confining people to their homes, stopping non-COVID medical care, and eliminating travel—will stop or eliminate the virus.
6. Masks will protect everyone and stop the spread.
7. The virus is known to be naturally occurring, and claiming it originated in a lab is a conspiracy theory.
8. Teachers are at especially high risk.
9. COVID vaccines stop the spread of the infection.
10. Immune protection only comes from a vaccine.

Dr. Emanuel Garcia, psychiatrist and psychoanalyst: “The past three years, in our Corona Epoch, have revealed to those with eyes to see and ears to hear the rank depths of corruption within virtually every institute of government and within virtually every formerly honorable profession.

“To have witnessed Medicine undermine itself in such a way as to make itself unrecognizable – in, for example, its sudden enthusiasm for masks, its sudden forgetfulness about early treatment and natural immunity, its sudden acceptance of a novel therapeutic agent that had been inadequately tested, its mania to subject children to this agent, its sudden scorn for informed consent and its equally sudden disregard of the founding principle of the Hippocratic Oath, at first not to harm – is to recognize outright self-destruction.

“That so many so-called medical practitioners abandoned their fundamental duties to their patients and themselves is a disgrace for which I can find no adequate word except prostitution – bearing in mind that in using this word I am doing sex workers a disservice because their form of prostitution represents an honest exchange.”
